1. Interface design & Code

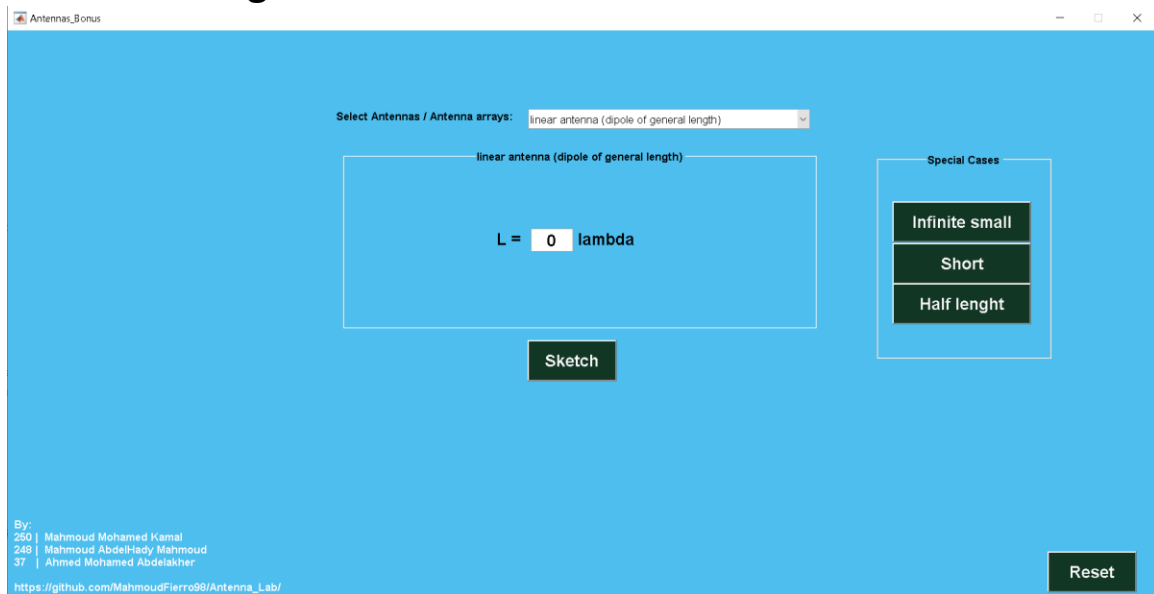

Figure 1: Interface design - linear antenna (dipole of general length).

1.1. Select

To choose any type of antennas you want.

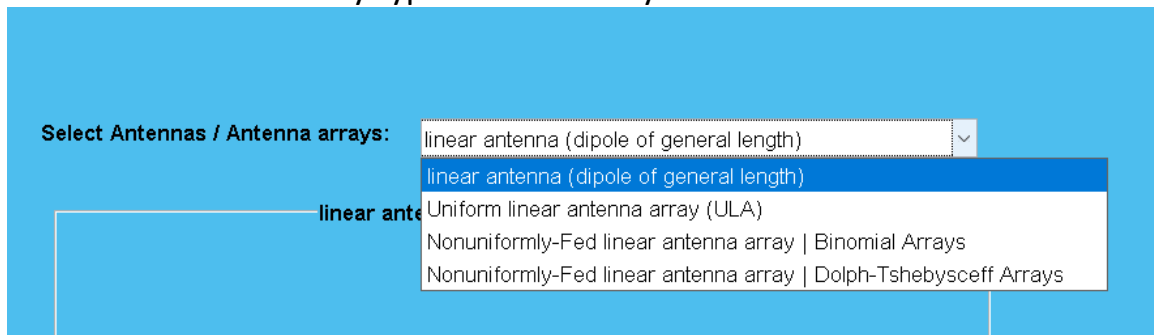

Figure 2: Select.

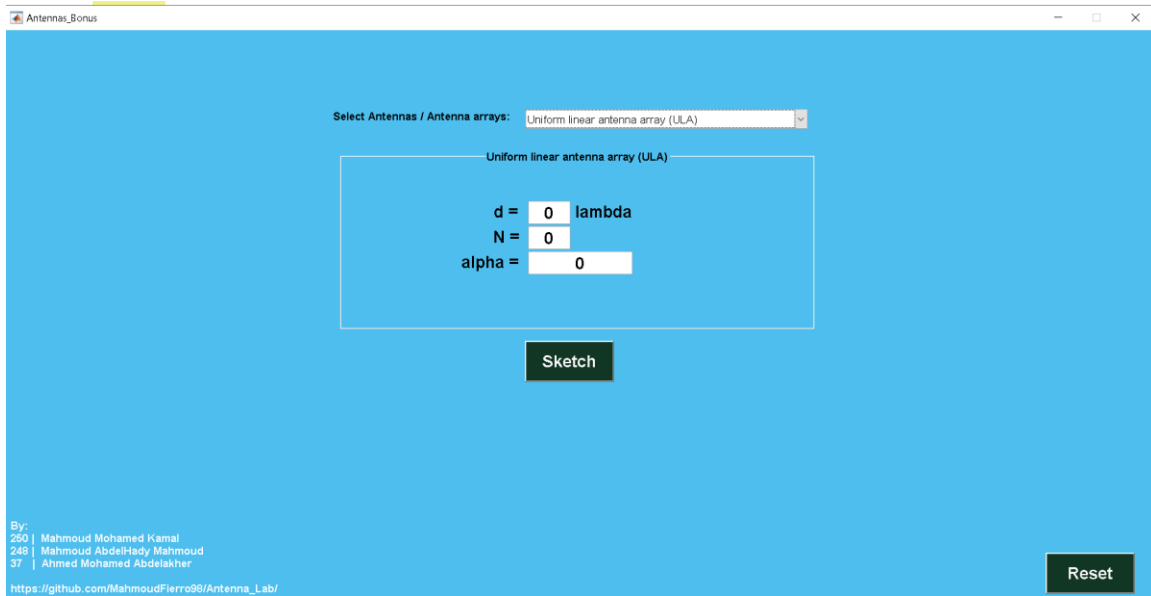

Figure 3: Interface design - Uniform linear antenna array (ULA).

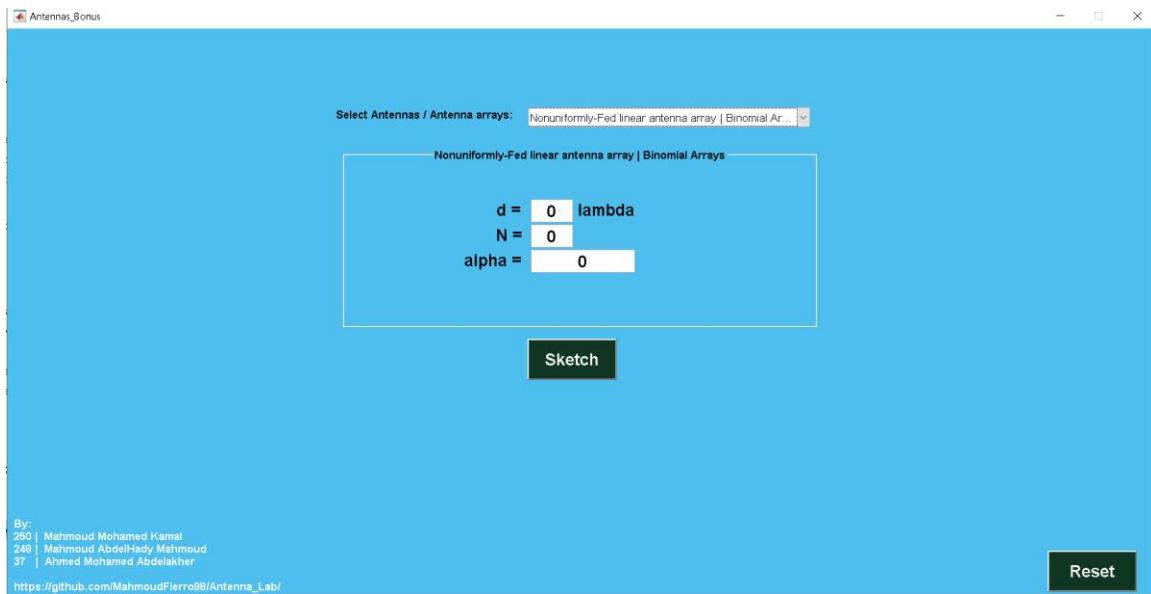

Figure 4: Interface design - Nonuniformly-Fed linear antenna array (Binomial Arrays).

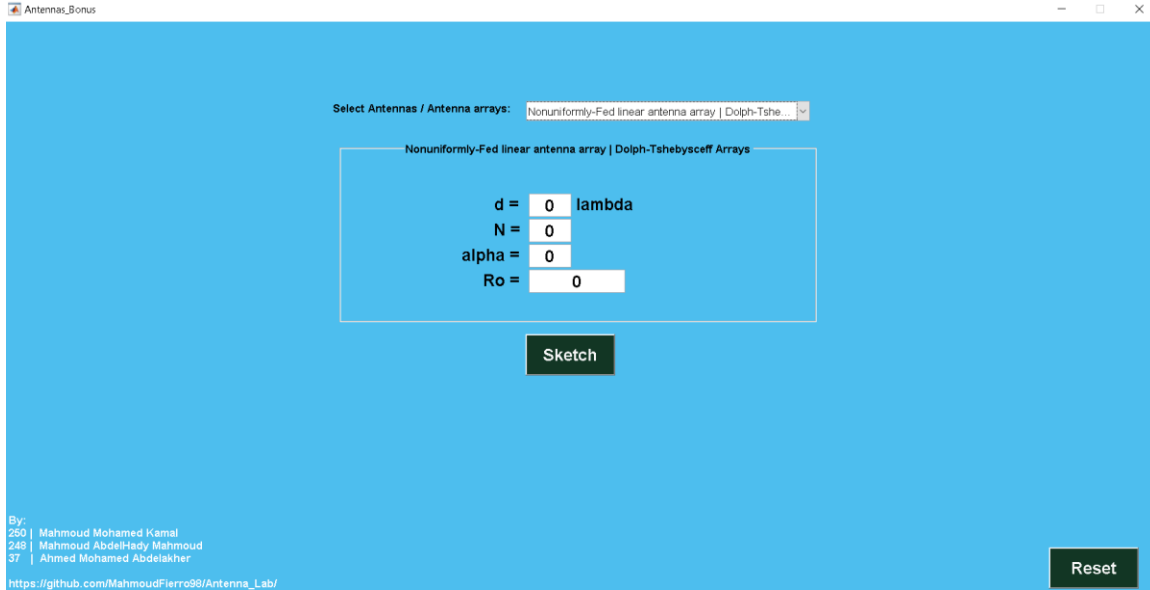

Figure 5: Interface design - Nonuniformly-Fed linear antenna array (Dolph-Tschebyscheff Arrays).

Figure 12: Code - Special Cases.

2. Examples

2.1. Part 1: linear antenna (dipole of general length)

Example 1: $l = 2\lambda$

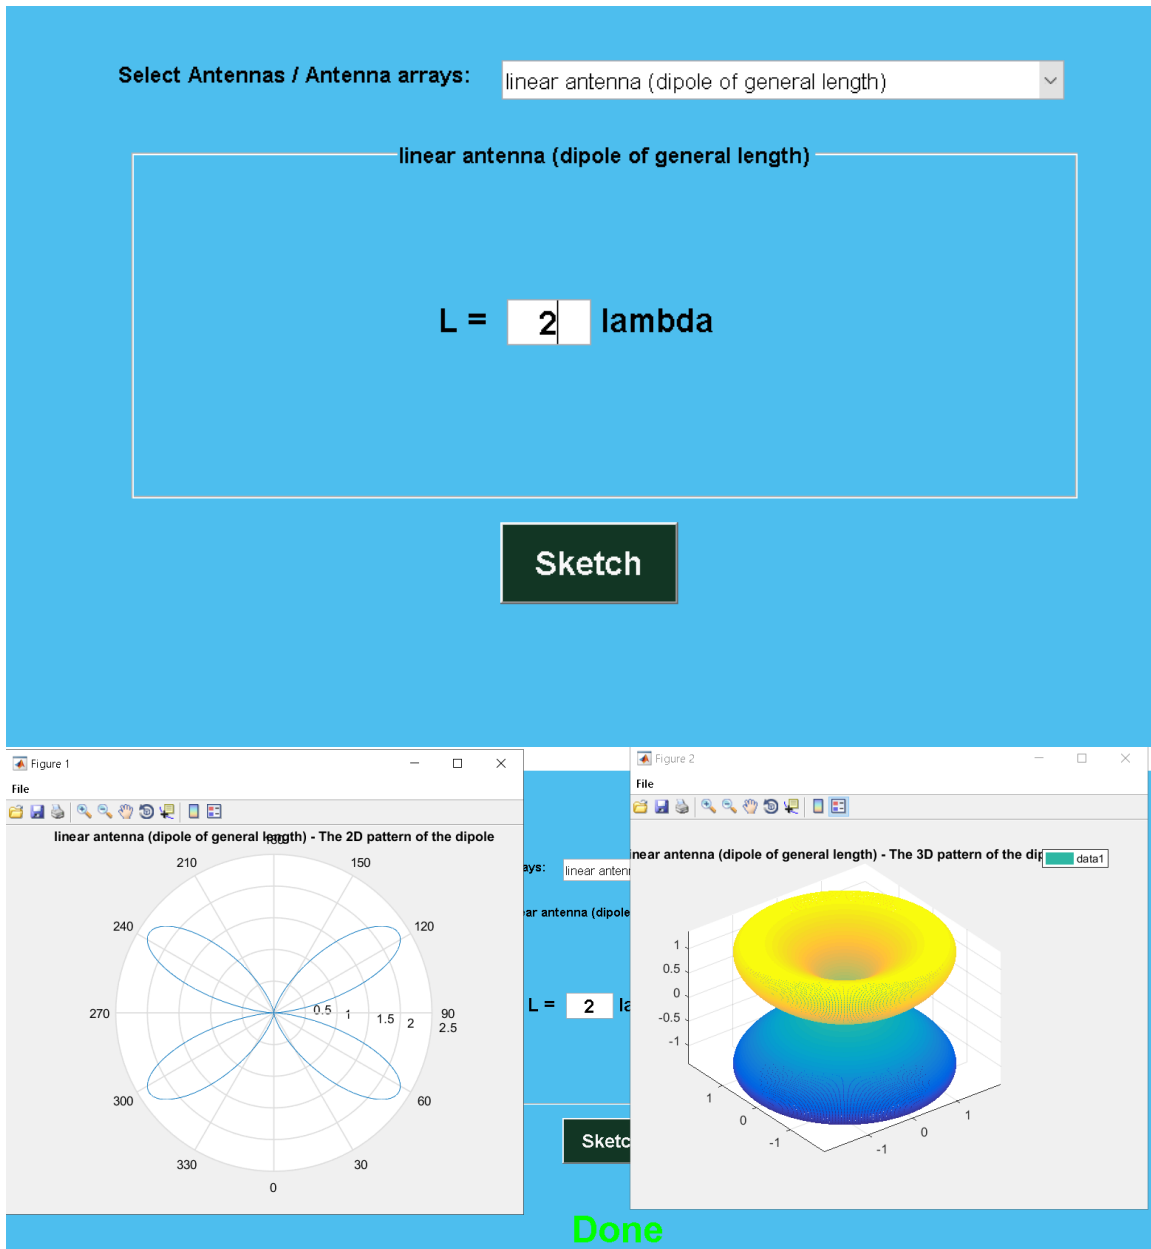

Figure 13: Example 1 - Part 1: linear antenna (dipole of general length).

Example 2: *Errors*
if $l < 0$

Select Antennas / Antenna arrays: linear antenna (dipole of general length) 

linear antenna (dipole of general length)

$L =$ lambda

Sketch

Error :: ($L \geq 0$)

Figure 14: Example 2 (Errors) - Part 1: linear antenna (dipole of general length).

2.2. Part 2: Uniform linear antenna array (ULA)

Example 1: $d = \frac{4\lambda}{7}$, $N = 7$, $\alpha = \frac{-4\pi}{7}$

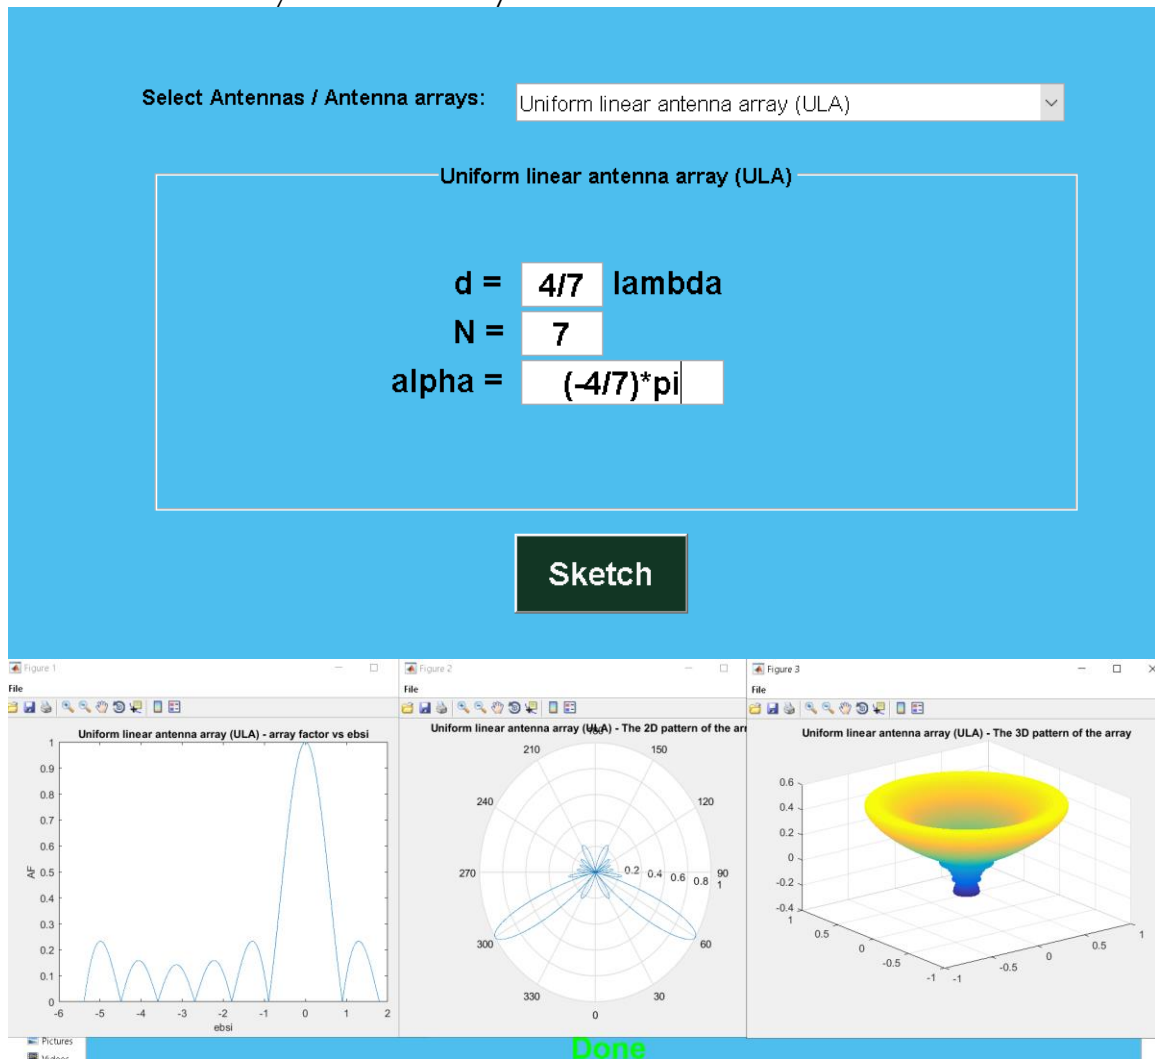

Figure 15: Example 1 - Part 2: Uniform linear antenna array (ULA).

Example 3: *Errors*
if $d < 0$ or $N < 0$.

Figure 16: Example 2 (Errors) - Part 2: Uniform linear antenna array (ULA).

2.3. Part 3: Nonuniformly-Fed linear antenna array

A. Binomial Arrays

Example 1: $d = \frac{3\lambda}{4}$, $N = 8$, $\alpha = 0$

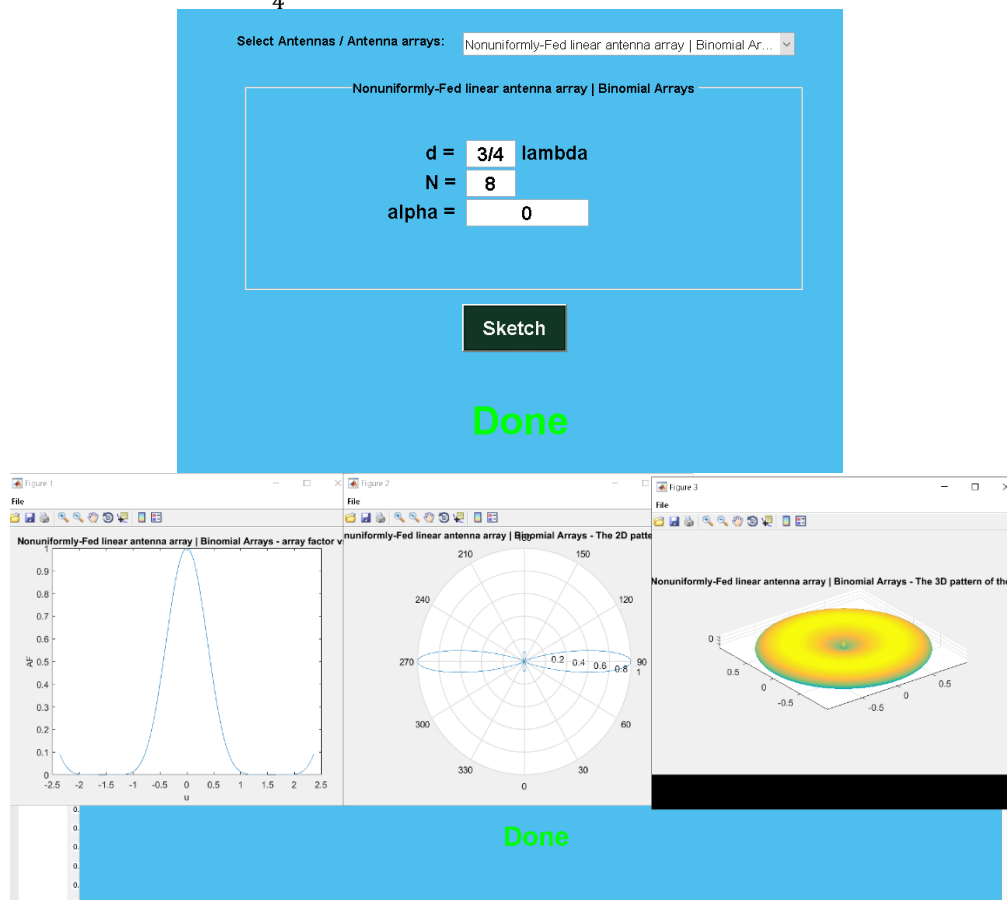

Figure 17: Example 1 - Part 3: Nonuniformly-Fed linear antenna array (Binomial Arrays).

Example 3: *Errors*
if $d < 0$ or $N < 0$.

Error :: (N >= 0)

Figure 18: Example 2 (Errors) - Part 3: Nonuniformly-Fed linear antenna array (Binomial Arrays).

B. Dolph-Tschebyscheff Arrays

Example 1: $d = \frac{\lambda}{2}$, $N = 6$, $\alpha = -\pi$, $R_0 = 10$.

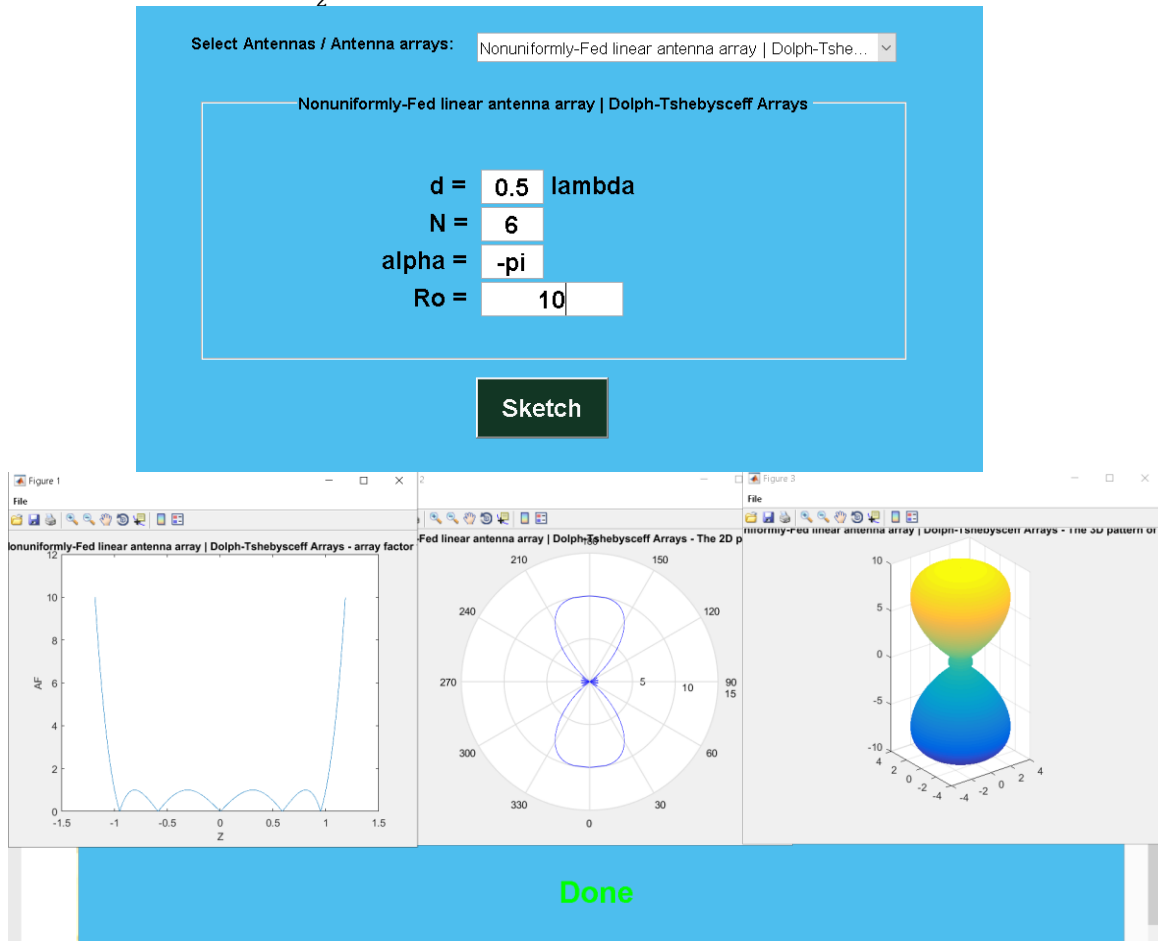

Figure 19: Example 1 - Part 3: Nonuniformly-Fed linear antenna array (Dolph-Tschebyscheff Arrays).

Example 3: *Errors*

if $d < 0$ or $N < 0$, we will ask you again.

Always $R_0 > 1$.
